[PLV 168-H 16-2/1](#)

WINCH UNIT , ANCHOR POS. C , LIFT SPEED 8 M/MIN ,
MOTOR 2,5 KW ; CODE PLV 168-H 16-2/1 (attached file)
Note: • According to the license plate photo of this winch,
the load capacity is 1600 kg, the breaking strength is 59 kN,
and the engine power is 2.5 kW. • The total length is 20
meters. Movement course is 2 meters. • The winch must
have a brake and a limit switch. The winch control is done
with automation, but the following items must be available
on the winch: • Wire rope limit switch, for the Beginning and
end of the course, you have at least one NC contact (in the
DEMAG winch set, each of these limits has two NCs, but one
of them was used). • The DEMAG winch set has a brake that
when the motor is energized, the conical rotor of the motor
comes out of the braking mode and rotates, and when it is
de-energized, it is engaged with the brake pad by a rotor
spring • A box must be installed next to the winch in such a
way that wiring is done from the motor and limits to the
terminals of this box. • This equipment will be installed and
used indoors (winch will be used indoors). • This equipment
will be used to open the furnace door vertically (lifting
loads). • This equipment is installed on the ground, so it
belongs to the fixed hoist group
